

Pipe 316L

Welded Pipes

Enhanced corrosion resistance for chemical and marine environments.

Recommended for lines requiring longer service life and stronger resistance to aggressive media.

Technical specifications

Steel grade	AISI 316L / 1.4404
Standard	ASTM A312 / ASTM A249
Size range	DN15-DN250
Wall thickness	1.2-8.0 mm
Delivery condition	Stock and project batches

Application areas

- Food processing lines
- Chemical units
- Water treatment systems
- Engineering utilities
